Des Foam PAA is used for surface disinfection within the food industry, agriculture and transportation sector.

FOAM DISINFECTANT FOR SURFACES

EFFECTIVE DISINFECTION

BROAD-SPECTRUM

DOSAGE

Dosage: 0,7 - 13%
Temperature: 4-20°C.
Contact time: 5-15 minutes.

Apply the foam on cleaning surfaces.

pH:

Delivery		~ 1,5
In aqueous solution	1 %	~ 4,5
In aqueous solution	3 %	~ 3,5

Use biocides safely. Always read the label and product information before use.

PROPERTIES

Agriculture: In stables for poultry, pigs, cattle and mink, as well as for transport vehicles and warehouses etc. The surfaces must be dry before animals are permitted to enter the stable.

Des Foam PAA is a broad-spectrum disinfectant that kills bacteria, fungi, spores and virus. Effective at low temperatures. To ensure optimal penetration in cracks and crevices, Des Foam PAA contains surfactants. Application will provide a light foam that ensures good wetting of the surfaces. The foam minimizes any obnoxious smell. Des Foam PAA contains peracetic acid and hydrogen peroxide. For this product no classification is required for environmental hazards.

More information about the product can be found on the product information sheet. Please, find it here:
