Nova Hoof Hygiene

One of the major challenges for milk yield in cows is hoof and limb disorders. Cows are often slaughtered due to lack of performance, but in reality it is often poor hooves that have contributed to the low performance. Cows with hoof and limb disorders have a longer standing time in the stable and go less to the feeding table, poorer reproduction and thus an increased risk of release.

Hoof disorders often arise from the physiology of the animals, stable conditions and management, and healthy hooves require high focus already from the heifer stage.

Nova Hoof Hygiene is an innovative liquid hoof product that is used in connection with acute hoof problems or preventive hoof care in cows, heifers, etc.

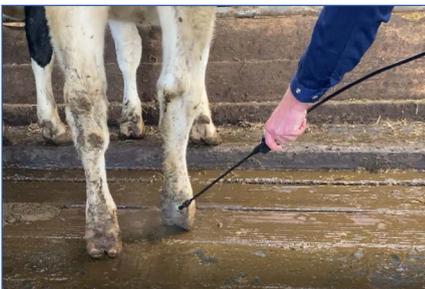

Nova Hoof Hygiene has a unique ability to reduce hoof disorders and is especially characterized by:

- Prevents hoof problems
- Lowers the pH in the slit opening of the hoof
- Can be used both as a direct spray and in hoof bath

Packaging sizes

20 kg cans/ 24 pcs. per pallet

200 kg drums/ 4 pcs. per pallet

Hoof spray

Hoof bath

Applications:

Direct spraying on the hooves.

- Nova Hoof Hygiene is sprayed undiluted directly on the back of the hooves 2-3 times a week.
- The hooves do not need to be washed before.
- Apply with back sprayer or automatic nozzle sprayer.
- Treatment can be performed from the milking parlor, or where the cows are caught in railings. Then the hooves are gently sprayed with Nova Hoof Hygiene from behind.

Hoof bath

- Nova Hoof Hygiene is used in hoof baths with a resolution of 5-10% depending on the size of the hoof problems in the cows.
- Treatment twice a week.
- There must be at least a water depth of 5 cm in order for the hoof to be covered with liquid when passing the hoof bath.
- When all cows have gone through the hoof bath, the bath is emptied and cleaned.

Hoof mattress

- 2-3 times a week on a non-slip mattress. Depending on the mattress, pour 30-40 liters of concentrated Nova Hoof Hygiene on the mattress.
- Do not dilute with water.
- For every 300 cows, pour again with 10 liters.
- Continuously remove superficial manure from the mat.

About Novadan

Novadan is one of the largest companies in the cleaning and disinfectant market in Scandinavia and growing into new export markets.

We develop and manufacture cleaning detergents, disinfectants and personal hygiene products.

We deliver cleaning solutions to a broad range of industries.
